

DUCHENNE MAP LAUNCHES PERSONALIZED CLINICAL TRIAL FINDER

[Duchenne Map](#) was created as an online platform to connect people living with Duchenne or Becker Muscular Dystrophy with their local patient organizations, healthcare providers, care centers, researchers, research institutions and companies.

Clinical Trials

On December 2021, a new clinical trial finder filter function was launched to simplify the search of clinical trials per eligibility criteria. Patient Organizations that are registered on the map, now have the possibility to find which clinical trials are available in their country and region. A specific search filter that allows clinical trials to be rendered based upon a specific age range, and ambulation or steroid use status, was also integrated.

REGISTER NOW

Care Centers

This year, the map will be enriched with a new function that allows users to find relevant care centers. Registered users will be able to find nearby care centers, as well as centers that provide a specific type of therapy or care.
